DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer^s filed on November 27, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US 6,356,644 have been received, as of January 13, 2007. The rejection over 6,356,644 was inappropriate and the recorded terminal disclaimers are hereby withdrawn.

2. However, the terminal disclaimer filed on November 27, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 5,981,616 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Response to Amendment

3. In response to the Amendment received on November 27, 2006, the examiner has carefully considered the amendments--see below.

Reissue Applications

4. Claims 54-58 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue, which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to claim subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope of claim subject matter surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

Applicant appears to be attempting to recapture the broad limitation "epoxy compound" in claims 54 and 58. In application 10/394,031 (now US 6,365,644) applicant amended the epoxy compound in claim 16 (now claim 1) to recite an epoxy compound selected from the group consisting of glycidyl esters of fatty acids, epoxidated soybean oil, and epoxidated linseed oil to

overcome/distinguish from the prior art of record--see amendment filed February 22, 2001, paper number 10. Thus the newly added limitation of just the epoxy compound (claims 54-58) is broadened in relation to the glycidyl esters of fatty acids, epoxidated soybean oil and the epoxidated linseed oil. And accordingly is barred by the recapture rules--see MPEP 1412.02

Oath/Declaration

5. The reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See 37.CFR 1.175(a)(1) and MPEP § 1414.

The statement of error is deficient because applicant identifies claims 51 and 66 in the reissue oath filed April 29, 2004; however, claims 51 and 66 were cancelled and are not errors that are currently being corrected.

6. Claims 21-25 and 54-58 are rejected as being based upon a defective reissue oath under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the claims 21-25 and 54-58 is set forth in the discussion above in this Office action.

7. The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

while applicant states that additional inventors listed on the patent on a separate sheet, however there is not a signed sheet that lists inventor, Takashi Ukachi.
